

Richard J. Stuckey, MBA – MIP Partner

Richard J. Stuckey, MBA, has over three decades of experience in information science, knowledge management and decision-making processes. He has used MIP's proprietary processes for "cloning" an expert's real-time decision-making processes. He has also participated in the development of MIP's Intellectual Capital Repository® (ICR) which uses cognitive technology. The ICR enables individuals throughout an organization to think like experts and achieve exceptional results by using an expert's "cloned" real-time decision-making expertise.

Mr. Stuckey participated in "cloning" the unconscious decision-making process of an expert physician/diagnostician by using MIP's proprietary processes. He worked with physicians at Rush University Medical Center and the University of Illinois at Chicago Department of Medical Education, which specialize in the study of clinical intuition and decision-making.

Mr. Stuckey is a retired Accenture partner. During his employment by Andersen Consulting/Accenture, he was responsible for the initial definition of the internal Knowledge Management system known as KnowledgeXchange, which evolved to support the firm's operations throughout the world. In his last position at Accenture, he had global responsibility for the implementation of Knowledge Management systems for the firm's clients. He was also responsible for development of significant systems and application software for the firm and its clients, for providing technical consulting for many emerging advanced technologies and for investigations into the impact of emerging technologies on the business of the firm and its clients. At Accenture, his clients were in the financial services, utilities, and healthcare and distribution industries.

Mr. Stuckey received his MBA from Stanford University. He was a Director of Camilion Solutions, a Toronto based startup that develops software for insurance companies, which was purchased by SAP. He was on the board of Directors and spent three years (2003 to 2006) in various sales positions with a startup company making LED lighting. He was a Director in Helix Commerce International Limited based in Toronto, which is a global leader in business innovation and collaboration commerce. The company's core focus is on accelerating clients' growth using innovation, third-generation knowledge management and Web 2.0 techniques.

Papers and Articles authored with MIP: "Making All of Your Staff High Performers," PM360 8/2013; "How Expert Decision-Making Processes Makes Big Data and Analytics More Valuable," MIP Corporation ©2013; "Reducing Cognitive Errors by Capturing and Disseminating Expert Reasoning," Society to Improve Diagnosis in Medicine, 10/2011. Mr. Stuckey authored a number of papers when he was working for Accenture.
